## Barn Owl Maths Measuring distances

Barn owls fly long distances every night. They will travel to different roosting places (where they sleep) and look for the best hunting grounds to catch their prey. Use the map over the page to measure the distance that the barn owl has to fly to get from one place to another.
A. Measure the distance from the farmyard to the road.

Distance $=$ $\qquad$
B. Measure the distance from the barn to the wood.

Distance = $\qquad$
C. Measure the distance from the barn to the pond.

Distance $=$ $\qquad$
D. Measure the distance from the wood to the road.

Distance $=$ $\qquad$
E. Measure the distance from the hollow tree to the pond.

Distance $=$ $\qquad$
F. Measure the distance from the barn to the road.

Distance = $\qquad$
G. Measure the distance from the farmyard to the hollow tree.

Distance $=$ $\qquad$
